PROFESSIONAL SUMMARY

Top-ranked Software Engineering student with hands-on experience in Python, Django, REST APIs, database design, and front-end development. Worked on an AI-assisted store creation system involving validation flows, multi-tenant data isolation, and system documentation. Strong communicator and team contributor with interest in AI and emerging technologies.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C++, C#, SQL

Web development: React, Bootstrap, REST APIs, Responsive design, HTML5, CSS3

Backend & Databases: Django, Database design, Multi-Tenant Systems, SaaS Architecture

Tools: Git, GitHub, Postman, Power BI, Jira, Agile/Scrum

Architecture & Concepts: Data Isolation, MVC, Layered Architecture, Design Patterns, SDLC

EDUCATION

Bachelor of Software Engineering

Syrian Private University **SPU** (Oct 2021 – Aug 2026 Expected)

GPA: 3.3/4.0 (Ranked 2nd university-wide (First Semester 2022))

PROJECTS

AI-Assisted SaaS Store Creation Platform | Python, Django, REST APIs, Database Design

Designed a SaaS-based store creation system with multi-tenant architecture and tenant data isolation. Worked on AI-assisted store generation, validation flows, draft handling, and system documentation. Defined use cases, test cases, and architecture decisions for store, product, category, order, and public browsing modules.

E-Commerce REST API | Django REST Framework, PostgreSQL, JWT

Developed a backend-focused e-commerce API with endpoints for authentication, products, orders, and payment tracking.

Implemented JWT authentication, role-based access control, product filtering, and structured order workflow.

Team Collaboration Platform | Python, Django, SQLite, JavaScript, Bootstrap

Built a full-stack platform for managing teams, roles, invitations, and task collaboration.

Developed REST APIs and a responsive dashboard with basic productivity analytics.

SOFT SKILLS

Problem Solving

Communication

Quick Learning

Teamwork

Documentation

Attention to Detail

Time Management

Adaptability

ADDITIONAL INFO

Languages: Arabic (Native), English (Fluent – Professional Proficiency)

Continuous Learning: Following AI/ML trends via courses and tech blogs; active contributor to programming communities.
